Authentication

The first steps to consume and use the RESTFul service, you must have a token, which is obtained by authenticating your account. This account is obtained through our Contact Center Department or through our sales executives.

Login:

URI: *URLAmbiente*/RadRestFul/api/rad/loginv1/login

This method receives two parameters:

user: User name
password: User Password

These parameters are the credentials with which the customer accesses the CustomerCentral portal.

Important: The password must be sent encrypted in Base 64.

Example Request:

```
{
  "header": {
    "security": {
      "user": "USER_ID",
      "password": "passtest"
    }
  }
}
```

After making the request, the server will verify the credentials of the user, and if they are valid, a token will be returned:

API Specifications Cancel Shipment Paquetexpress.

Example Response:

```
{
"header": null,
"body": {
"request": null,
"response": {
"success": true,
"messages": null,
"data": {
        "token":
"eyJhbGciOiJlUzl1NilsInR5cCl6IkpXVCJ9.eyJleHAiOjE1MDQ1Mzk4MTg2MDUsImlzcyl6IkdPTERFTjE3In0.1L-
4eMEXEVWIcqQv3HxXnX3Ym0ZNyWjJSJ1fOtbGB3A"
},
"objectDTO": null,
"time": "1122.0 miliseconds"
}
}
}
```

In the case that incorrect credentials are provided, a response like the following will be returned:

```
{
"header": null,
"body": {
"request": null,
"response": {
"success": false,
"messages": [
{
"code": "401",
"description": "Error: Combinacion de usuario y contraseña incorrecta",
"typeError": "ERROR"
}
],
"data": null,
"objectDTO": null,
"time": "572.0 miliseconds"
}
}
}
```

IMPORTANT: The generated token has an expiration of 30 seconds to be used.

Cancel a shipment

Once the token is obtained, you can send the API to cancel the shipment; this API Cancel your shipment generated as long as it is not collected.

Cancel:

URI: *URLAmbiente*/RadRestFul/api/rad/v1/cancelguia

This method receives a parameters: user, token and tracking number in the form of canonical data described at the end of the document:

Request example:

```
{
  "header":{
    "security":{
      "user":"USER",

"token":"eyJhbGciOiJIUzI1NiIsInR5cCI6IkpXVCJ9.eyJleHAiOjE2NDM4Njl5MzA1ODIsImIzcyI6IldTSk
FHSVAifQ.mJqTYeuAKDPL1yGJSC2HIoOGKzLUrfPQM0YGAKvO1ql"
    }
  },
  "body":{
    "request":{
      "data":[" 05167128636"]
    }
  }
}
```

Successful response example.

```json
{
   "header": {
      "security": null,
      "device": {
         "appName": null,
         "type": null,
         "ip": "qa-Barracuda",
         "idDevice": null
      },
      "target": null,
      "output": null,
      "language": null
   },
   "body": {
      "request": null,
      "response": {
         "success": true,
         "messages": null,
         "data": "Cancelación exitosa",
         "objectDTO": null,
         "time": "195.0 miliseconds"
      }
   }
}
```

Response example with error

```json
{
   "header": null,
   "body": {
      "request": null,
      "response": {
         "success": false,
         "messages": [
            {
               "code": "500",
               "description": "The Token has expired on Wed Feb 16 19:33:23 MST 2022.",
               "typeError": "ERROR"
            }
         ],
         "data": null,
         "objectDTO": null,
